HANDY HABIT - UI REVIEW

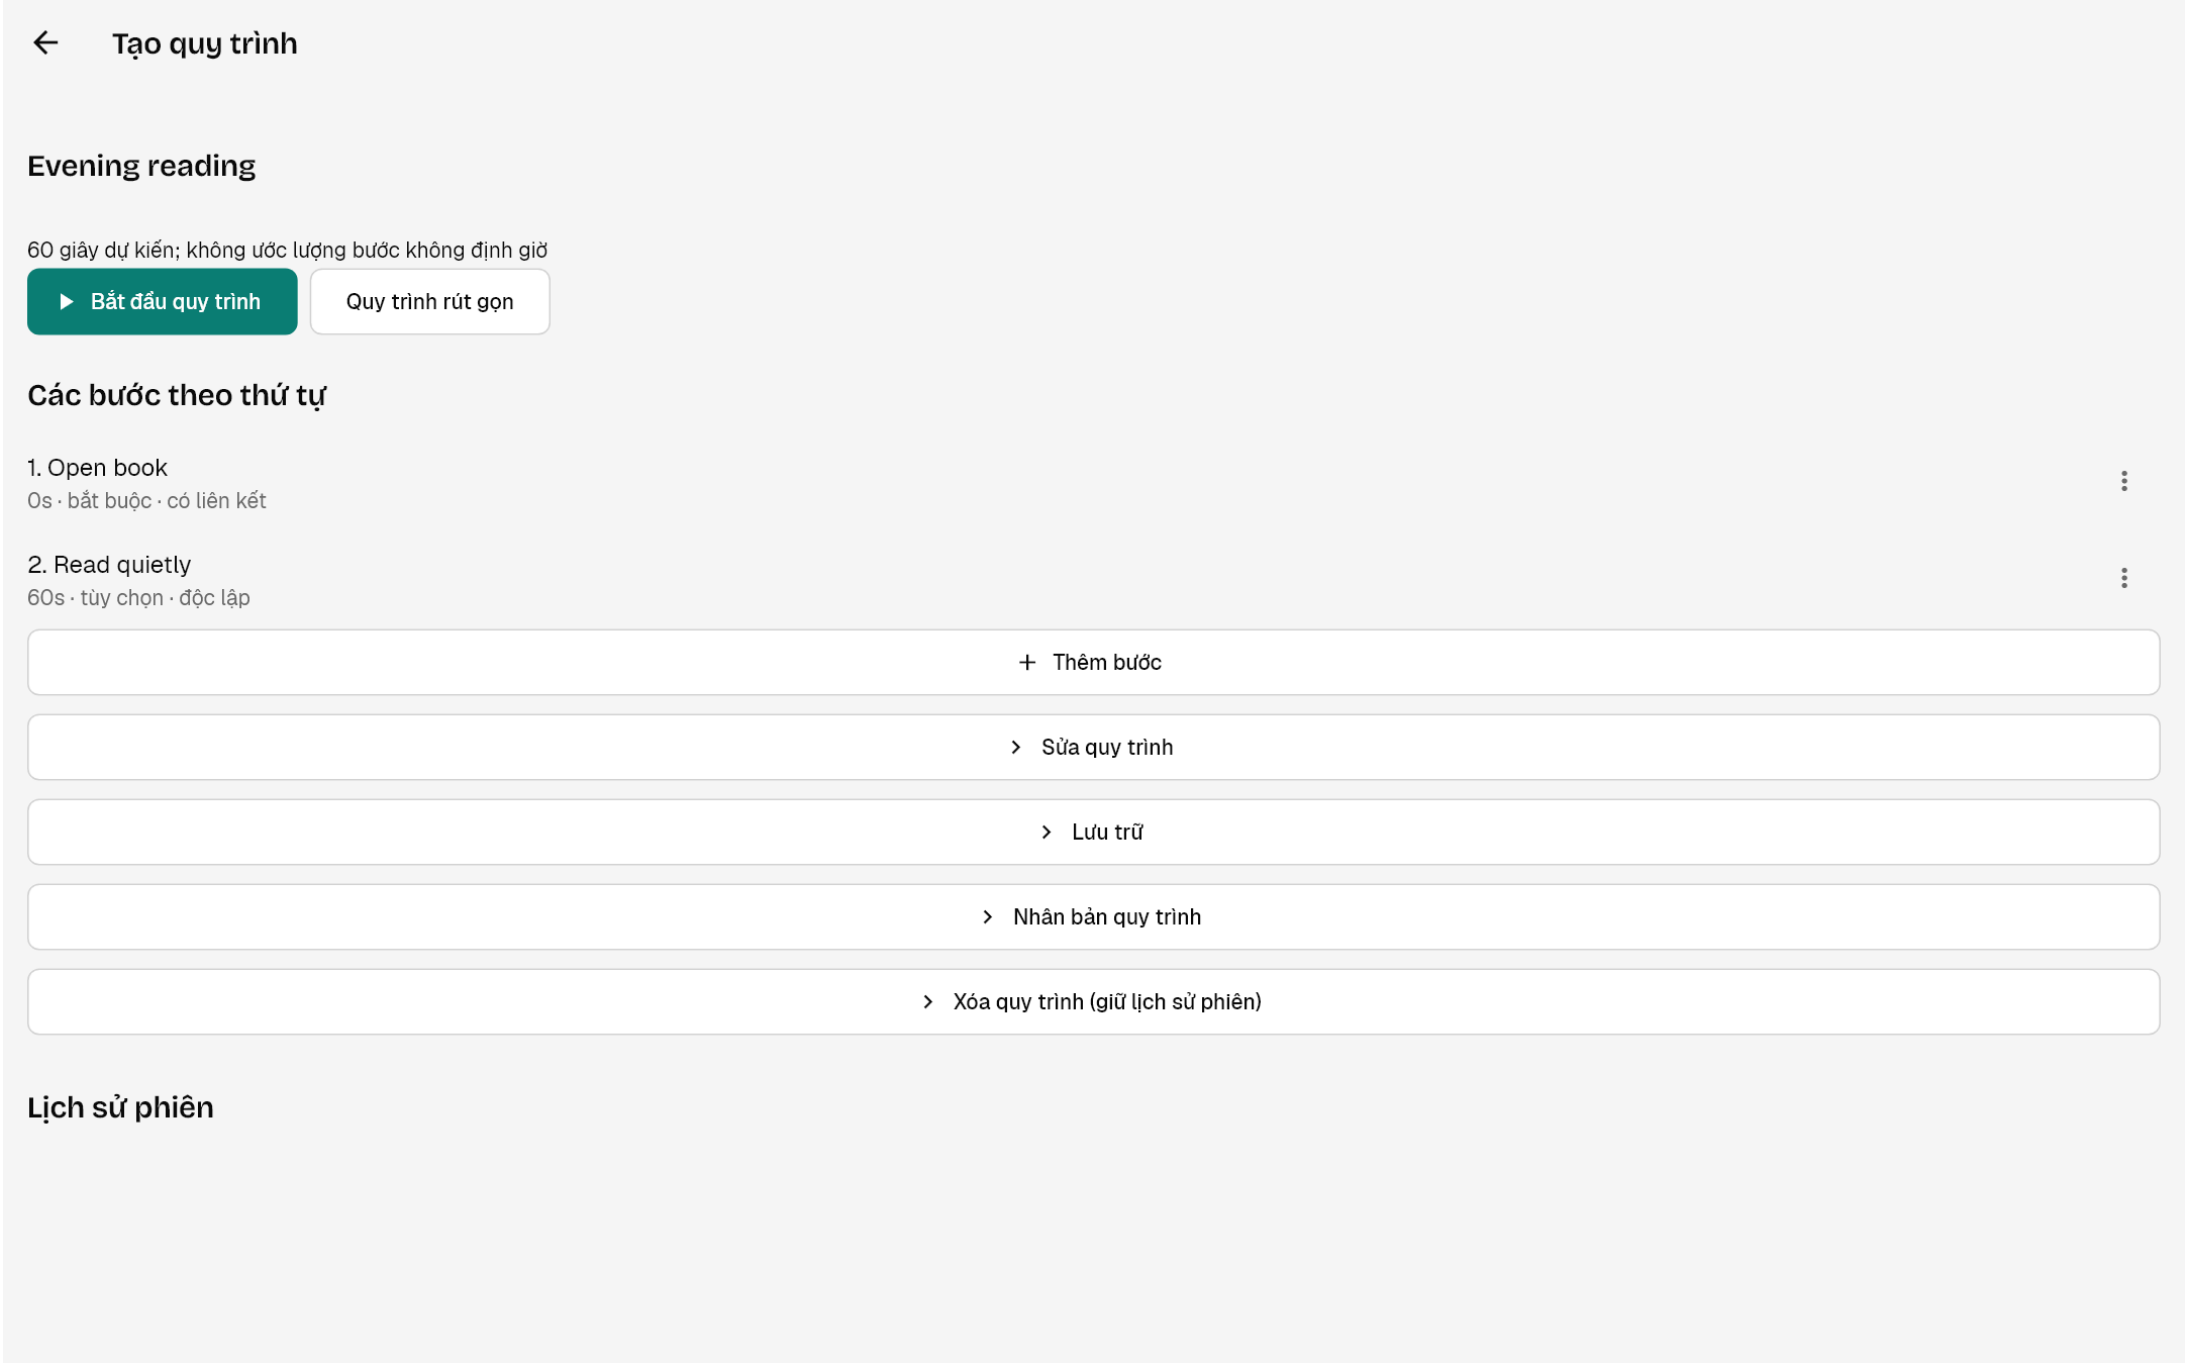

Real Flutter-rendered screens with bundled fonts.
Widget captures use explicit QA fixtures and fixed dates.
Native captures come from HandyHabit_QA_API35.
Neither source is physical-device, iOS or browser certification.

Review: legibility, hierarchy, tap areas, long Vietnamese text,
empty/dark states, Lite decisions and runner progress.
See docs/handy_habit/QA_PLAN.md for test/build limitations.

35 captures follow. Captions identify provenance.
